Founded in 2002 and headquartered in New York and Miami, JDS is a national firm focused on acquisition, development, and construction, recognized for its architecturally significant mixed-use projects that respond to each community and push the boundaries of engineering and design. JDS projects include Walker Tower, The Fitzroy, Stella Tower, other award-winning collaborations with the world's top architects and designers.

Mercedes-Benz Places in Miami represents the fourth large-scale project between JDS and SHoP Architects. Other JDS and SHoP projects include the recently completed supertall 111 West 57th Street in Manhattan, on the ultra-luxury Central Park facing condominiums; Brooklyn's first supertall The Brooklyn Tower, a mixed-use project of condominiums and rental apartments with retail in its base and the historic Dime Savings Bank of Brooklyn; and The American Copper Buildings on Manhattan's East River, a pair of copper-clad "dancing" towers with a skybridge and 760 luxury rental apartments.

JDS has long been active in the South Florida market, achieving record sales for Echo Brickell, Echo Aventura, and Monad Terrace by Ateliers Jean Nouvel. In the summer of 2023, JDS announced the supertall at 888 Brickell, Dolce&Gabbana, Miami, a condo-hotel project with the global fashion house.

FIELD OPERATIONS

Founded in 1999, Field Operations is a leading-edge landscape architecture and urban design practice based in New York City, with offices in San Francisco, Philadelphia, Shenzhen and London. Field Operations is renowned for strong contemporary design across a variety of project types and scales, from large urban districts, master plans and complex planning sites, to small well-crafted, detailed design projects. Regardless of scale, there is a special commitment to the design of a vibrant and dynamic public realm, informed by the ecology of both people and nature, rooted in place and context.

The ultimate aim is to bring beauty, health and vitality to the different kinds of environments where people live and interact. Given the current day urgency of creatively addressing challenges of changing climate, diminishing resources, environmental decline, social inequity and rapid urbanization, they focus upon design that thinks and acts big, that elegantly solves real problems, and shapes a more sustainable and resilient world for everybody.

The Park

Southside Park

The re-envisioned Southside Park is one of the largest green spaces in Brickell, supporting community gathering. The park serves as a connective node to the Brickell neighborhood through the pathways of Miami's recently opened and celebrated UnderLine (also by Field Operations). The entire city block is conceived as a harmonious pedestrian and public realm. The energy and experience of the city is drawn through the park at the ground level, creating an integrated pedestrian experience that, rising with the building, redefines and extends it into the sky.
